

# Teens' reactions to things that REMIND THEM OF SMOKING

Cocaine Ecstasy Heroin Marijuana  
NICOTINE TEENS Comparison

## What is the purpose of the study?

To study how teen smokers respond to things that might remind them of smoking.

## Who can participate in the study?

This study is accepting boys and girls who:

- Are 13 to 17 years of age
- Are in generally good health
- Smoke cigarettes daily
- Are not reducing or trying to quit smoking cigarettes
- Can bring a parent/guardian with them to the first study visit

## What will participants be asked to do?

The study consists of 3 study visits within 1-2 weeks.

Participants will:

- Provide urine samples and breath samples
- Have checks of blood pressure, heart rate, and skin temperature
- Hold and view items that may or may not remind them of smoking
- Work on a task to get puffs from cigarettes
- Complete questionnaires about smoking and mood

## Where is the study taking place?

The NIDA Intramural Research Program is located on the Johns Hopkins Bayview campus in East Baltimore.

## Will there be any cost?

There is no cost for participation.

## Will I receive payment of some kind?

All study participants will be compensated for their time and travel.

## How can I find out if I'm eligible to participate?

Call **1-800-535-8254** for a confidential screening.
